

Telified™ HC

HEALTHCARE'S REAL-TIME LINK TO AUTHORITATIVE CONSUMER DATA

The healthcare industry is facing unprecedented levels of risk. Medical identity theft has serious consequences, both monetary and in compromised personal medical records resulting in misdiagnosis, wrong treatments, or wrong prescriptions. Experts agree there is no single solution, but Healthcare can leverage some of the best practices the financial sector has in place.

Telified has proven invaluable to reduce the impact of fraud and theft by verifying the contact data supplied by patients. It is an easy-to-use service from a HIPAA compliance focused company that already serves as a Business Associate to some of the world's largest healthcare companies.

BENEFITS

- Protects against fraud in real time
- Reduces identity theft
- Streamlines good customer experience
- Economical for low-value transactions
- Speeds account setup

FEATURES

- Uses available name/address/phone, SSN/DOB optional
- Validates against phone company records or optional consumer credit files
- Returns easy-to-use fraud risk levels
- Authoritative results
- Leverages financial sector best practices
- HIPAA compliant
